

TiP™ Launch

Launch is a training and education offering for newly purchased equipment.

GE HealthCare's TiP Launch develops a customized and flexible clinical training program based on your staff's skill levels, learning preferences, and department needs. TiP Launch helps ensure that you're utilizing equipment to its maximum potential and performance — helping you get the most out of your investment.

Enhance your team's confidence with **TiP Launch**, a comprehensive solution for seamless integration of new imaging equipment.

The Customer Learning Journey is a customized training plan that provides a blended training program including self-paced, instructor-led virtual training and onsite training which builds staff confidence, ultimately optimizing system performance for top-tier imaging and patient care. Through a collaborative partnership, training is tailored to maximize staff competency, understanding your unique goals.

Launch enables you to level up your team's skillset with education tailored to everyone's stage of learning

TiP Launch provides access to expert clinical assistance and offers scheduled virtual training options. Join a global online user community for peer insights and access to online training, video tutorials, clinical webinars, and expert cases. For select modalities, the GE HealthCare Institute offers hands-on classroom training. Contact your GE HealthCare Sales Representative for details on classes and immerse your team in focused learning for optimal outcomes.

- 
Preparation
 Customized training plan created with your input by you and for you with your clinical education trusted advisor
